

# Matt Carter

A Full Stack JavaScript web developer with a passion for building creative, complex web applications. Looking to bring my detail-oriented engineering approach to collaborate with smart people to help solve hard problems, whether that be on the frontend with React or Angular, or the backend with Node and Express.

## EXPERIENCE

### General Assembly, San Francisco, CA

#### *Web Developer*

Jan 2016 - Apr 2016

Completed a 12-week course, working with other developers and independently on a diverse variety of projects. Practiced agile development principles, building full-stack applications using MVC architecture.

## PROJECTS

### Anagram Battle!!

<http://www.anagram-battle.com/>

<https://github.com/mcarter78/anagram-battle>

Designer/Developer(front-end) - JavaScript, ExpressJS

### BirdSpots

<http://birdspots.net/>

[https://github.com/mcarter78/birder\\_app](https://github.com/mcarter78/birder_app)
